	MEMORANDUM FOR: Director of Training	
	SUBJECT: Weekly Report #43 Assessment and Evaluation Staff 22-28 October 1958	
	1. In response to the TSS request for training of TSS	051/4
25X1	personnel in instructional techniques, and I contacted Chief of the TSS Training Division. It was	25X1
20/(1	agreed that a one week course similar to the one had	25X1
	formerly given would be offered to TSS personnel during the week of 17 November. Space for this course is being provided by TSS.	
25X1	wanted TSS people   given a course there.	25X1
	will be touching base with later this week. It was tentatively agreed to do this the week of 15 December	25X1
	or the week of 5 January. These offerings are regarded as stop-	
	gap measures to take care of immediate needs while develops his program in this area.	25X1
25X1	2. through his activities in the S&T course, has brought A&E into contact with OSI personnel who are studying	
	developments in the social sciences in the USSR.  Chief, Medical Division, OSI, and of his office recently drafted a paper entitled "New Trends in Soviet Behavior Research." The paper is based upon a review of some 6000 overt	25X1
	references pertaining to Soviet research and interests in the	
	social science fields. General conclusions of the review are that there has been a definite movement in the USSR toward a	
	development of the behavior sciences since the 20th Party Congress	
	of the Communist Party in 1956. Indications are that this is an	
	integrated approach in which all interested disciplines; e.g., biology, sociology, psychology, psychiatry, political science,	
	etc., have been focused on the science of human behavior. With	

the official support of the Government and the advanced computer facilities available in the USSR, the movement has the potential

of making rapid advancement in social science research.

Weekly Report #43	
	25X
is coordinating this effort within our staff and will provide OSI with our informal reactions to this review sometime this week. OSI has requested that the paper not be distributed beyond the A&E Staff since it represents a tentative position which will probably be revised before it is released.	
organization has undertaken. The study was originated by A&E	
to collect material for the S&T course. The DDP/SR Division has a major interest in this research.  will monitor the project and will coordinate information available within the SR Division with the work being done outside the Agency. Although the project will require ten months for completion, it is expected to provide information of value to the S&T course and to SR Division as it is produced.	25X <sup>-</sup>
